

Why are Quality Equipment Spray Rigs the Best Available?

Our Rigs are Designed for Safety

- Belt guard - brightly painted, protects technician
- Safety Shut Off at Hose End Helps Reduce Chemical Spills
- Honda Engines include Exhaust Deflector to Reduce Heat Damage
- Stainless Steel Hose Band Clamps at Hose End to reduce cuts/snags
- Heavy Duty Steel Reel Lifts & Fill Hose for Anti-siphon Mean Less Bending & Back Strain for Technician

Our Rigs are Designed for Durability

- 3/16" Steel Frame
- All Joints are Double Welded
- 600 PSI Chemical Hose
- High Quality Components: Honda Engines (2 year manufacturer's warranty), Hypro Pumps (1 year manufacturer's warranty), Cox Reels (1 year manufacturer's warranty), Spraying Systems
- Each rig is reviewed and tested with a 40 Point Quality Checklist before delivery

Our Rigs are Designed for Maintenance & Service

- Harsh Chemicals mean your rig requires periodic maintenance
- All Components are easily accessible for maintenance
- Major Components are rebuildable
- Tank is plumbed for bottom feed - reducing vapor locks and suction problems
- Gate Valve before Filter Allows Filter Clean Out in Field
- Heavy Duty 3/16" Steel Motor Mount - Slotted to Allow Adjustment of Belt Tension
- Skid designed for easy cleanout – keep truck clean & free of chemical buildup
- Emergency Repair kit to allow In-The-Field Repairs of common problems

These features are standard on our gas-powered rigs; Your rig may be different based upon your specifications. Some exclusions apply to manufacturer's warranty. Please review warranty for details.
